Industrial applicability (IA)

Inventive step (IS)

The invention relates to a method and a device for managing a battery system including a number of serially coupled batteries, voltage detecting means, DC-to-DC converting means and a controller for detecting and controlling the voltage distribution over the batteries. The invention also relates to a computer readable medium comprising instructions for enabling a computer to perform the method according to the invention.

Reference is made to the following documents:

D1: US6275004 B1 D2: US6046573 A D3: US5656920 A.

Claims 1 and 8

The invention according to claim 1 includes following steps:

- 1. Detecting the battery voltage over the batteries of the battery system.
- 2. Utilizing a voltage imbalance between batteries of the system during operation of the battery system.

Document D1, which is considered to represent the closest prior art, describes an apparatus for balancing a battery module including a plurality of batteries in the battery module. A DC-DC converter is monitors at least one of the battery voltages and controls the battery voltage of the battery with reference to the monitored battery voltage.

A method and a device according to claims 1 and 8 are known

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: $Box\ V$

from document D1. Thus, the invention defined in claims 1 and 8 is not new and lacks novelty and inventive step.

Consequently, the invention defined in claim 12 is not new and lacks novelty and inventive step.

Claims 4-7 and 9-11

Dependent claims 4-7 and 9-11 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and inventive step.

The invention is industrially applicable.
